RHUMART Pulsating Electromagnetic Field Therapy

In just over one hundred years, our technology has drastically changed the natural magnetic environment of the earth. We are now literally swimming in man made ELECTROSMOG.

The negative effects are now being brought to our attention by the [World Health Organization](#) and the [Council of Europe](#). At the same time, our governing health authorities are approving technology that uses Pulsating Magnetic Fields (PEMF) to help control depression, heal bones, increase blood circulation plus much more.

It's a dramatic shift for healthcare when doctors and scientists now recognize that magnetic fields can heal when pulsed at low frequencies similar to the magnetic fields of the earth. We are now taught that humans are Bioelectric life-forms that have evolved using these natural fields. Unfortunately, man-made ELECTROSMOG has overpowered that connection.

Our system, the Rhumart® Tesla-Schumann Regenerator is one solution to this complex problem.

Uses for the RHUMART Regenerator

The RHUMART creates pulsed Magnetic fields (PEMF) from coils of wire. This is known as PEMF therapy. It has had a very long successful history in treating animals for a wide variety of conditions. For over 30 years, this regenerator has been used by veterinarians to help bones, relieve arthritis, treat infections, heal wounds and reverse illnesses. Animals have that “sixth sense” and instinctively know that PEMF is a safe and effective way to regain their health and maintain it.

Animals will often literally jump at the chance to experience the healing powers of the RHUMART pulsed magnetic wave. PEMF therapy is FDA approved and is a widely adopted means for bone fractures and depression for humans because of it's proven effectiveness and safety for animals and humans.

Scientists believe that all life depends upon the earth's natural magnetic fields for survival. Without it, [many become ill](#) within days. On the other hand, seeds that have been germinated in the presence of a strong pulsed magnetic field of low frequency will grow faster, are healthier and more resistant to environmental contaminations.

The RHUMART Regenerator can be used at plant nurseries and by gardeners because of the convenience of the shape and durability of the coil rings. Also, the device is capable of selecting different parameters of intensity and frequency that are similar to the fields that emanate from the earth. It acts like an amplifier to increase the earth's magnetic field directly into the cells of the plant.

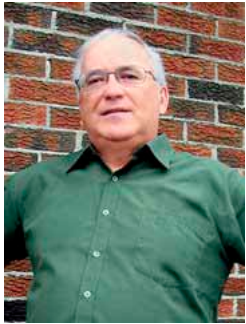

Mineral water that flows under the ground and over rocks in streams becomes naturally charged and structured by the natural magnetic fields of the earth.

The city tap water that you drink, and the bottled distilled water you buy is depleted of nature's magnetic frequencies because of the processing and the long journey it takes to reach your home.

The RHUMART Regenerator radiates pulsating magnetic fields that are very similar to the natural magnetic fields of the earth. You can use it to recharge, revitalize and restructure the water molecules so they can be better absorbed by the cells of plants, animals and humans.

How Does It Work? The Science Behind The RHUMART Regenerator

Dr. Roland A. Drolet, Ph.D. is the developer of the Bioelectric RHUMART system. He obtained his M.A.Sc. and Ph.D. degrees in Biomedical Engineering from the University of Toronto and taught at Laval University in the Department of Medicine and the Department of Electrical Engineering from 1971 to 1975.

In 1967, Dr. Drolet developed a safe and effective method to stimulate the peripheral nervous system using the natural electrical action potentials (AP) of the body during a research project on urinary bladder stimulators. Dr. Drolet and Urologist Dr. Talibi, M.D eventually [published their results](#) in 1970 in the British Journal of Urology and The Canadian Urological Association awarded them first place for their contribution.

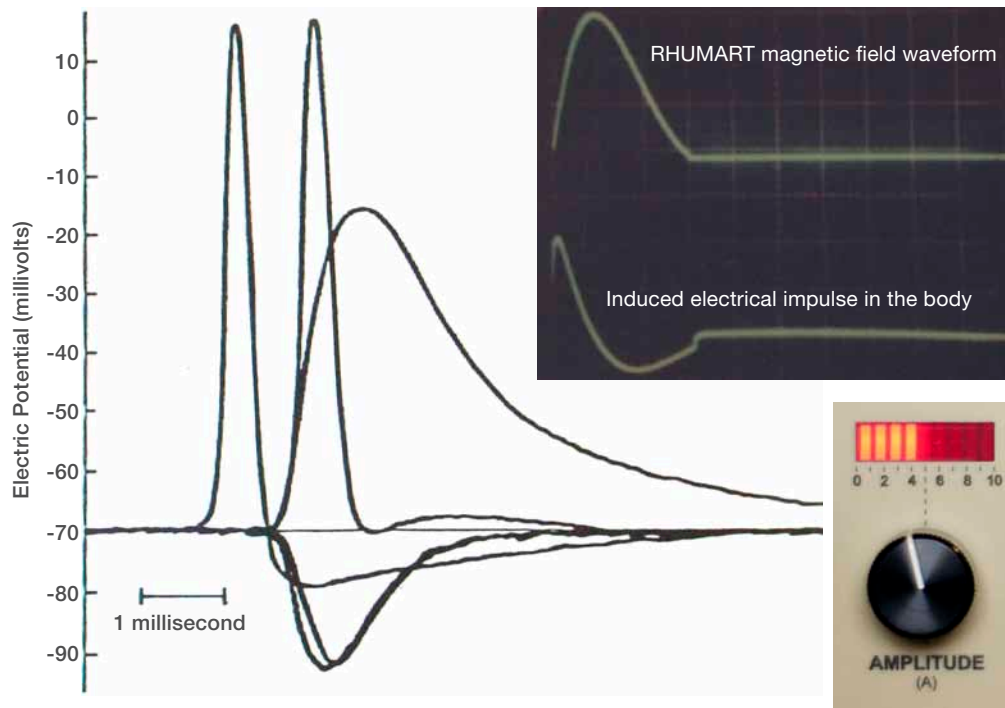

As a university teacher and researcher of bioelectric medicine, Dr. Drolet eventually became familiar with ongoing Soviet medical research that involved the transmission of low-intensity, low-frequency pulsed electromagnetic energy through the air via coils of wire. As a professor of electrical engineering, he was also well versed with the inventions of Nikola Tesla, who in 1899, while attempting to transmit electrical energy through the earth [first discovered](#) the natural pulses of magnetic resonating frequencies now known correctly as the Tesla-Schumann Resonances.

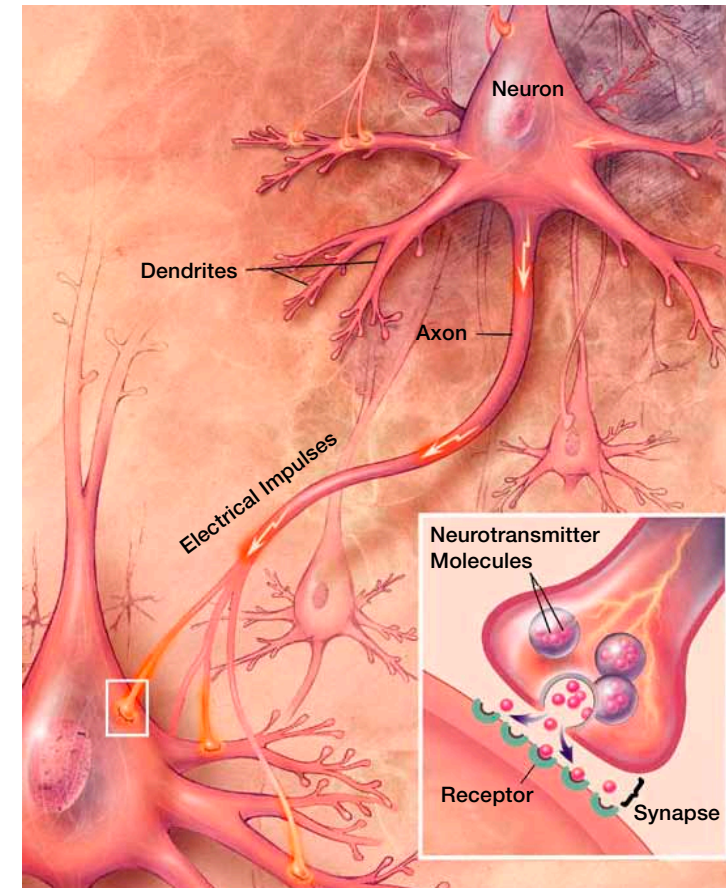

Nikola Tesla, the inventor of AC electricity first discovered the natural pulsed healing frequencies of the earth in 1899.

Intensity of the RHUMART Wave in Natural Action Potentials (AP)

Understanding these fundamental properties of electromagnetism and its beneficial effects on the human body, in 1977, Dr. Drolet decided to produce a Tesla-Schuman Magnetic Resonance Regenerator utilizing a waveform that was similar to the natural Action Potentials (AP) of the human nervous system. He called these impulses (RHUMART pulse bundles). His invention was very successful to help control rheumatism (RHU) and arthritis (ART) and therefore decided to name the device after these health conditions - RHUMART.

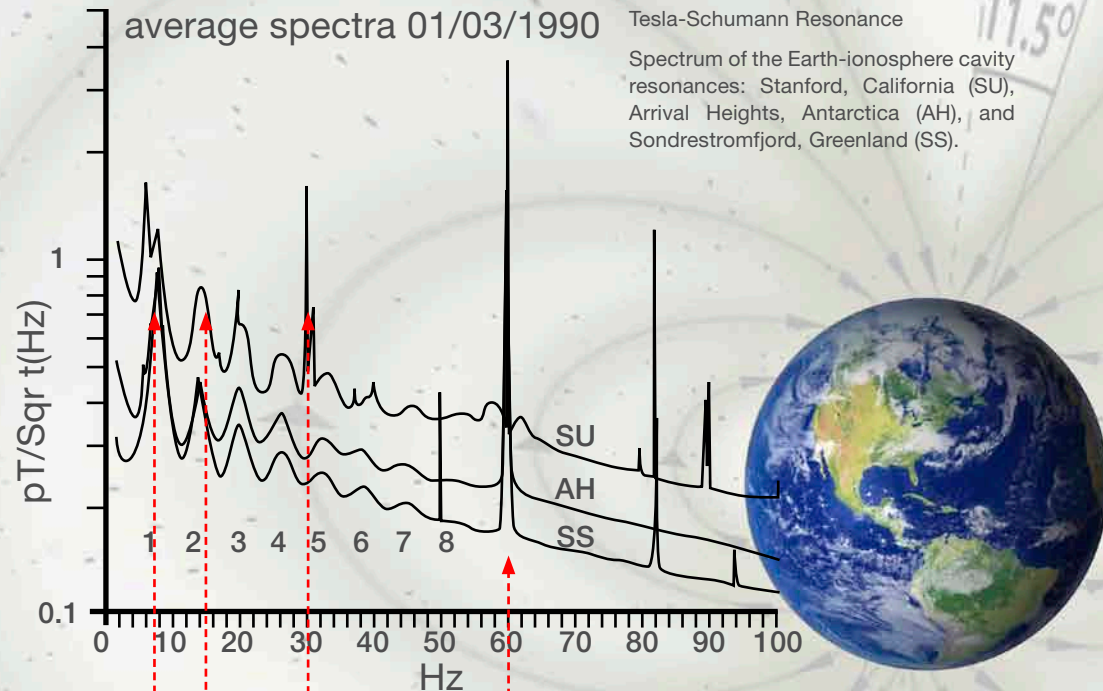

The power density of the induced Bioelectric RHUMART impulses is very low: in the range of zero to twenty micro-amps per square centimeter. This is the electrical current density range of naturally occurring calcium-ion impulses which are essential for the normal transmission of Action Potential (AP) signals through nervous system synapses and from axons to muscle fibres.

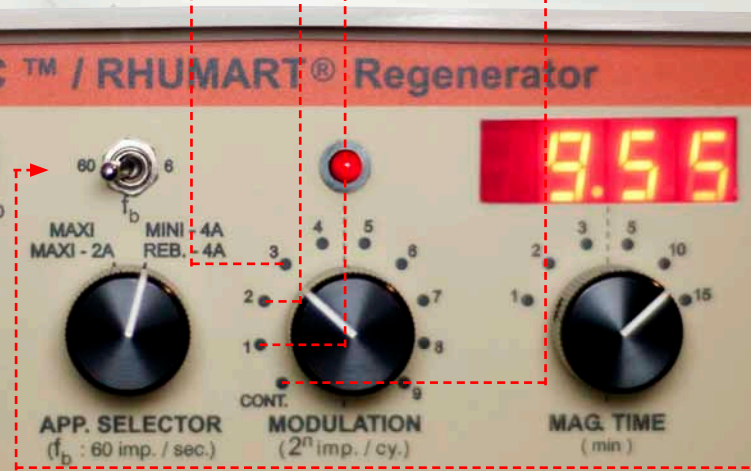

Electrosmog and other environmental toxins that are absorbed by the body can cause the membrane voltage of a cell to become depleted. A healthy cell is -70 millivolts. If the cell becomes damaged and the voltage drops, it cannot pass along the charge through the nerves - we then experience pain at the blockage points. In simple terms, our body's wiring system is shorting out and stops the flow of energy to the muscles and organs. The RHUMART Regenerator assists the body to recharge the cells back to the natural Action Potential voltage of -70 millivolts and to transmit the basic communication signals throughout the body.

Relationship of RHUMART Waves to Tesla-Schumann Resonance

Tesla believed that electricity could be used to heal the human body and regularly energized himself using electromagnetism. The RHUMART frequencies or pulse bundle rates are variable and based upon the natural resonating frequency and natural harmonics generated around the Earth. Tesla felt that 60 Hz was the fundamental frequency of the universe and decided to transmit alternating current (AC) electricity, first from Niagara Falls using that basic frequency.

The graph to the left shows the natural resonating magnetic pulses of the earth known as the Tesla-Schumann Resonance. The measurements were taken in California, Greenland and the Antarctic and are overlaid here to show how they are similar. Notice the dominant 60 and 7.5 Hz spikes in all of the locations. The other peaks are harmonics or equal divisions of 60 Hz (30, 15, 7.5 etc). The 60Hz spike is quite noticeable in the Antarctic even though there is no electrical power. The 50Hz frequency that is used by most of the world for power distribution is absent except for a small spike in Greenland.

The basic frequency toggle switch f_b can be positioned at 60 or 6 pulses per second. The modulation control knob divides those basic by half (2^n imp./cy.).

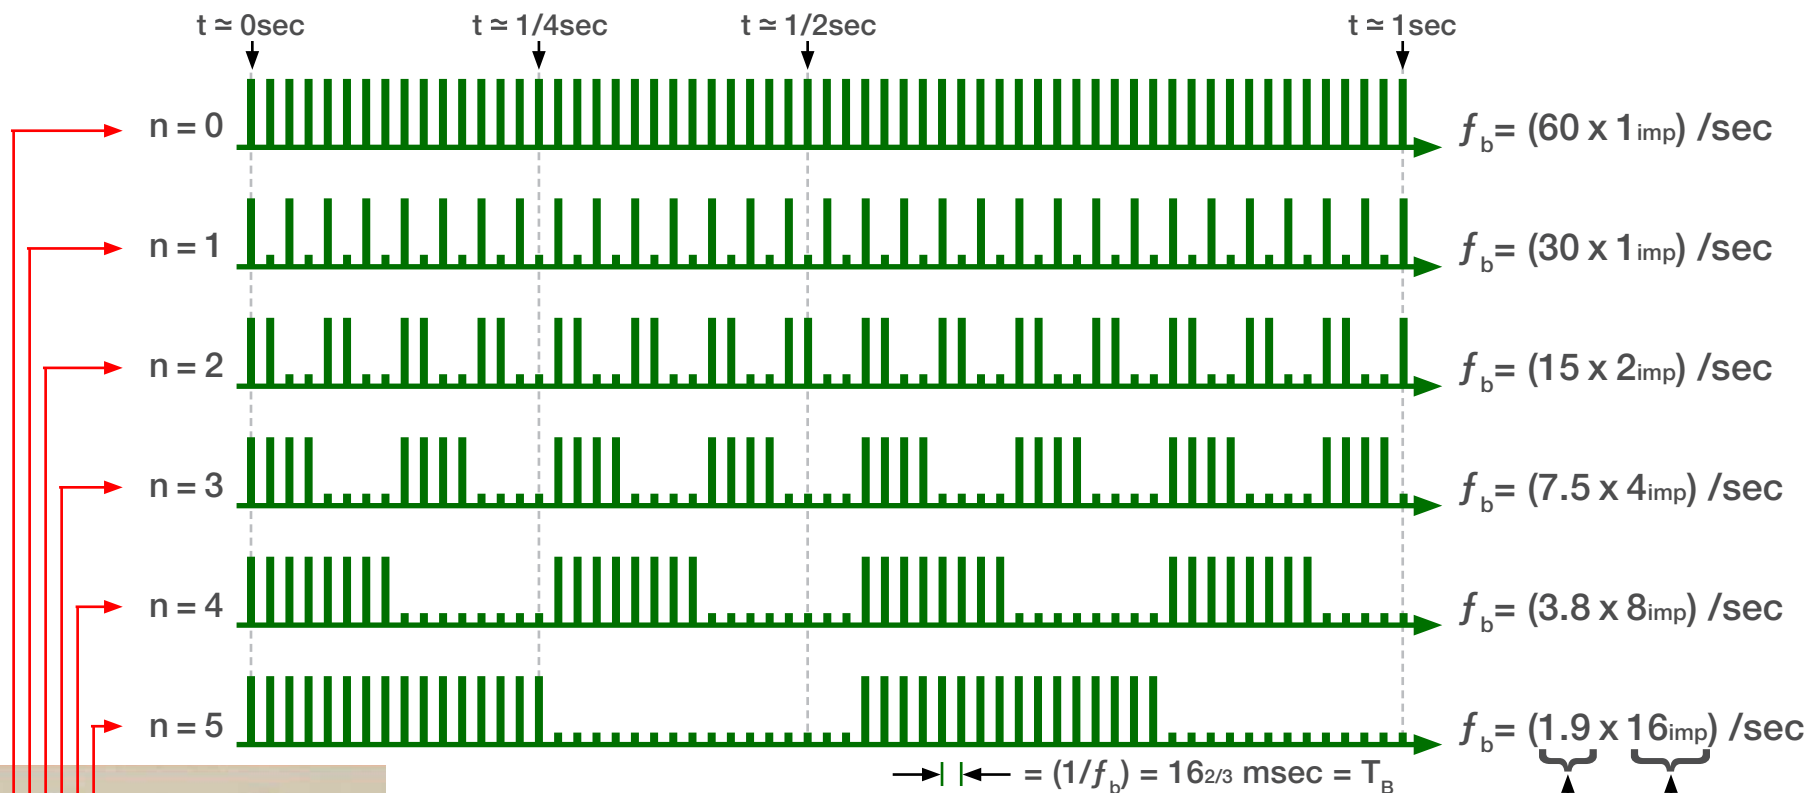

Setting the toggle switch to 60 provide harmonic frequencies of 30, 15, 7.5, etc. Setting the switch to 6 gives you variations of 6, 3, 1.5, 0.75, etc. This is adjustable by the **MODULATION** control.

The basic Frequency of pulses (f_b), or pulse rate in RHUMART pulse bundles, can be selected and they are based upon the 60 Hz Tesla-Schumann harmonic resonance frequency. The selectable **MODULATION** frequencies of basic RHUMART pulse bundles are based on this fundamental 60Hz frequency.

Technical Specifications of the RHUMART Wave Sequence

Visual representation of the RHUMART wave impulse sequences: for n-MODULATION values of 0-5.

[Click on an impulse sequence below](#) to view an animated simulation of the impulse sequence.

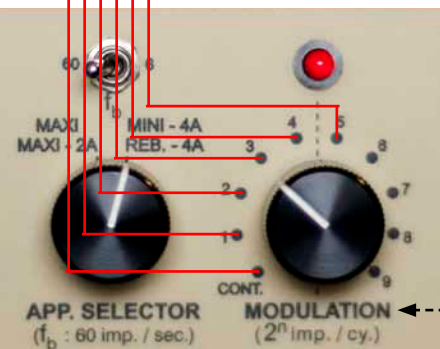

The highlight of the RHUMART system is the ability to alter the pulse rate. For example, 30 and 15 pulse bundles per second have a relaxing effect. Pulse bundles of 7.5, 3.8, and below have various stimulating effects.

Frequency of pulse bundles

Number of impulses (imp)
per bundle = 2^{n-1} , for $n \geq 1$

MODULATION (n)
 2^n sites of pulses per cyclic pattern

Benefits of the RHUMART System

To summarize, the RHUMART system induces the physiological type of bioelectric impulses produced by the human nervous system. The pulse bundles are modulated in strict relation to the basic Tesla-Schumann harmonics that have been proven to have a healing effect. The range of power density for these induced electrical impulses, is that of calcium ion current-impulses which are absolutely essential for the proper functioning of the human and animal nervous system.

This scientific method provides a fundamental understanding of why the RHUMART Tesla-Schumann Resonance Regenerator when properly used, can and does induce many of the essential physiological (or biological) effects, including the following:

- relaxation of the nervous system
- physiological vasodilation and improved blood flow
- pain killing and anti-inflammatory effects
- improving the natural bioelectric repair and healing processes
- strengthening the natural immune system responsible to protect the body from various micro-organisms present in the immediate environment or within the body.

In addition it will help prevent or control: arthritis, inflammation, chronic pain, shingles, stress, depression, poor circulation, wounds, ulcers, burns, sores, injuries, back aches, sprains, bone fractures, osteoporosis, degenerative diseases, insomnia, migraines, hypertension, premature aging, and much more.

REBONE 4A MINI pads

MAXI 2A rings

The APP. SELECTOR allows you to select the large rings for global, whole body application, or the pads (also known as the REBONE-4A) for local applications such as the knee, neck, shoulders, etc.

Specifications

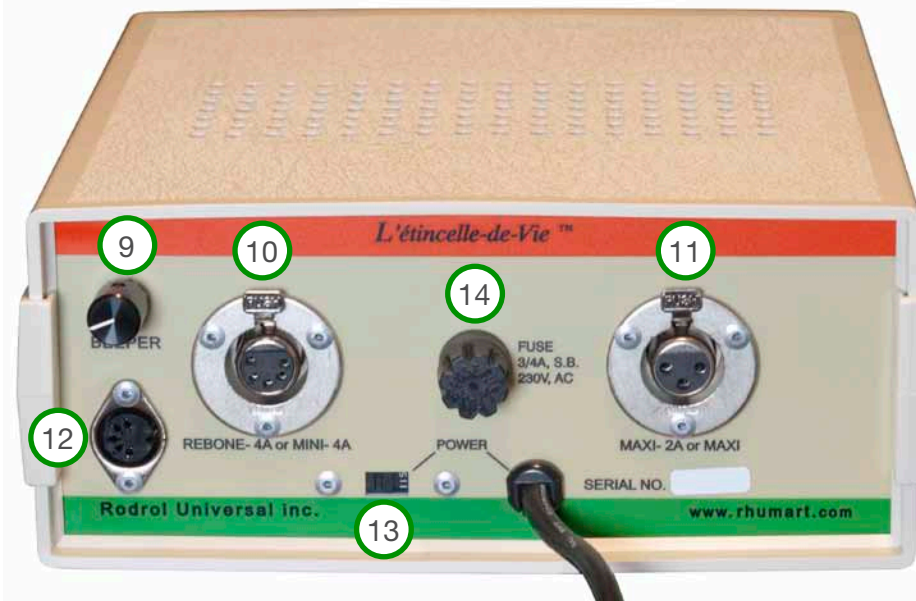

Play 360 VR

- 1 - Power switch and indicator light.
- 2 - Amplitude or intensity control.
- 3 - Applicator selector for rings or pads.
- 4 - Basic pulse frequency selection switch. Usually set at 60 for rings and pads. For Super-TENS option 6 is also used.
- 5 - Modulation control. Examples (n=2): anti-pain, anti-stress, anti-inflammation (n=3): improved blood circulation, stimulation, bioelectric cell regeneration.
- 6 - Modulation indicator light shows when pulses goes through the selected applicator.
- 7 - Timer - Selectable from 1 to 15 minutes.
- 8 - Start session switch - Indicator light also allows you to view conditioning pulses.
- 9 - Sound volume control indicating that the session is in progress.
- 10 - Outlet for the pads (XLR).
- 11 - Outlet for the rings (XLR).
- 12 - Outlet for the RHUMART® Super-TENS option.
- 13 - 115V or 230V AC power supply selection.
- 14 - Fuse 3/4 amp. 230V AC Slow Blow.

Customer Testimonials

Since 1980, users of the RHUMART system can testify to the amazing healing powers of their Bioelectric pulsed waves.

"How can I be anything but enthusiastic? How can I be sad about the fact that I was in pain for seven or eight years, and then, all of a sudden, the pain was gone?" -Jaques Matte

"I wasn't myself anymore. I could even say I was dead for two years... My doctor said there's nothing more to be done... You're going to have to live with the pain... In November 1990 I bought a RHUMART system... In February 1991, I went back to work and I am very happy about that." -Jaques Guilbault

"We bought our system after my husband had a heart attack, because we wanted to increase his resistance, but I ended up literally monopolizing it. I practically lived on cortisol. That's gone too!" -Doris Simard

"I have suffered from angina for at least ten years... I suffered from back pain for twenty years... After only two sessions, I had no more pain in my back or in my arms." -Wallace Lapierre

"I had arthritis in the elbows, hips, lower spine, knees - just about everywhere... One year after buying my RHUMART system things were going so well I made a suggestion to my wife, 'why don't we have a baby!'" -Bernard Proulx

"It's been two months since I stopped taking any medication. I'm back to work and everything is great." -Urbin Faucher

RHUMART Tesla-Schumann Resonance Regenerator

PATENTS OF INVENTION

RHUMART® systems are based on the electrophysiology of the nervous system, as described in several patents:

- U.S. Pat. No 5 620 463
- U.K. Pat. No 2 277 270
- Cdn. Pat. No 2 058 179
- Jap Pat. No 1 603 545
